

interact™
solution

ENHANCED EVALUATION SOLUTION

the solution for Physician Assistant Education

Interact Solution™ is a cohesive turn-key online video simulation tool that is supportive of today's blended learning methods and teaching techniques, collaborative observations and evaluations through our online web portal. This innovative solution is your gateway to improving and enhancing your students' valuable skills through a virtual video learning environment. The interact Enhanced Evaluation Solution also fosters live video critiquing and evaluation with the purpose of developing new skills and processes.

Video Simulation & Evaluation / Self Reflection

Live Video Training & Coaching

Secure Student and Professor Collaboration

Mobile App for Tablets & Smartphones

“

Today's student needs to be taught differently. Traditional methods such as lecturing and exams does not provide for a great learning experience for the tech savvy generation. Interact enables students to develop their skills through active, self assessment. Interact is completely hands on. There are a lot of moving parts in implementing any type of technology endeavor. The interact employees are true professionals and delivered on a great technology product that has enabled Elon to create an engaging learning experience.

—Michael Rodriguez, Ph.D., Elon University

WHAT

Adopting intuitive technology extends budget and accelerates advancement to full capacity in:

- Clinical Simulations
- Easy to use secure web-based video technology for Flipping the Classroom and Blended Learning
- Step-by-Step Learning and Certification
- Specialized and/or Personalized Experiences
- Quality & Compliance Conformity Tracking

WHERE

Anywhere, worldwide!

- Access App through your network, via Wi-Fi, or by using your devices' data service
- On-site (in the office, classroom, conference room, clinical, Observation or Emergency Rooms)
- Off-site (in the field, at client locations, home, alternative office, airport, etc.)
- Accessibility from multiple locations and by multiple individuals simultaneously
- Access via PC, laptop, tablet or smartphone (web app for Apple© and Android©)

WHY

Adopting video technology in simulation accelerates a student's learning curve and understanding by 74%. Add notes, observations, and critiques and watch them soar!

- Distance & virtual learning
- Mentoring & coaching tool
- Customized course/product training - Simulation of patient care
- Product introductions - Helps create innovative teaching processes (ex. flipping Classroom and blending learning)

HOW

- InteractLIVE™ two-way streaming
- DualSYNC™ side-by-side live viewing and/or recording from multiple camera angles with synced annotations
- Recordings viewable and sharable within 60 seconds of reaching our Server
- NO VIDEO BUFFERING!

GENERAL

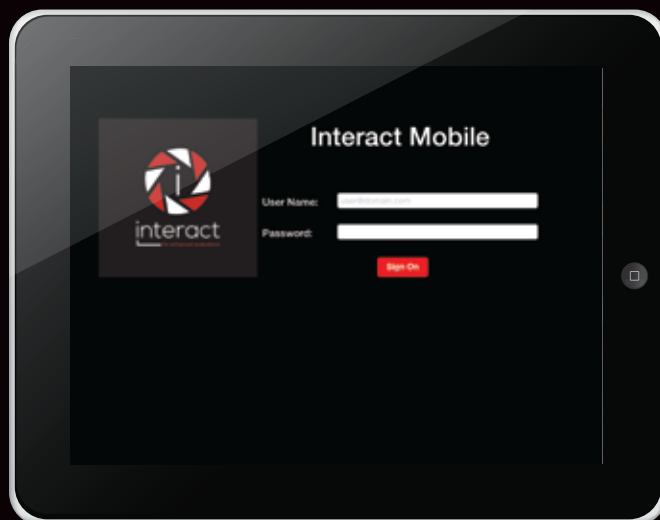

- Activity tracker that captures login, content viewing, sharing, and task movements
- Secure and private sharing and definable restriction access
- Customizable for your logos, color preferences and overall branding
- Password and Login security, 24/7
- Self-authoring video for quick self-reflection and advancement
- Time-sliced video annotates for quick reference
- Mobile App captures not only keyboard typing but also on-screen drawn and written notes
- Microphone and mini-earbuds for two-way communication

Web Based Server

- HIPPA Compliant for Proprietary Information
- You OWN the content
- Use your Network Server or our Cloud Solution
- Unlimited Users, User profiles, file sharing
- Profiles may contain: video, photo images, documents, and spreadsheets
- Integrates with other applications
- Built-in Upload

Data Distribution

- Easily distribute content to
 - One or multiple individuals
 - Group by organization, location, department, section, or classification
