

interact™
solution

HIGHER EDUCATION

the solution
for evolving education

Interact Solution is a turn-key video learning development and educational solution that accelerates students' growth through innovative teaching techniques, video evidence, and timely cooperative collaborations. No matter the environment, simulation, role-play, or field study, Interact improves valuable skills while tracking areas needed for improvement. It fosters efficient and unique methods of enhancing personal self-reflective experiences that may easily be shared with others through the Interact data distribution portal.

- Video Evidence and Observation
- Performance and Self-Reflective Evaluation
- Online Teaching Collaboration

“

Today's student needs to be taught differently. Traditional methods such as lecturing and exams does not provide for a great learning experience for the tech savvy generation. Interact enables students to develop their skills through active, self assessment. Interact is completely hands on. There are a lot of moving parts in implementing any type of technology endeavor. The interact employees are true professionals and delivered on a great technology product that has enabled Elon to create an engaging learning experience.

”

—Michael Rodriguez, Ph.D., Elon University

WHAT

Enhance teaching experiences and accelerate learning proficiencies with real-time or recorded video interaction between professors, students, and clinicians.

- Labs (observation of students and participants, psychology, clinical)
- Therapy (play, speech, reading)
- Student counseling coaching
- Research projects (special needs, teacher evaluation, psychoanalysis)

WHERE

Anywhere you are connected to your network or where there is internet connectivity.

- On-site (classrooms, observation labs, science and research, viewing room, campus offices)
- Off-site (access for field studies via our mobile app at remote locations)
- Accessibly from multiple locations and by multiple individuals simultaneously
- Accessible using PC, laptop, tablet or smartphone (mobile app for Apple & Android)
- Record video using network or wireless camera, webcam, flip cam, tablet or smartphone
- Side-by-side live viewing and/or recording from multiple camera angles with synced annotations
- Self-authoring video for quick self-reflection and advancement

GENERAL

- Customizable with your logo, color preference, and overall branding
- Report tracking that captures IP address, Login ID, task activity, and viewing timeframes
- Secure private sharing and definable restriction access
- Unlimited User IDs and profiles
- Password and Login secure, accessible 24/7

WHY

Adopting video technology in education accelerates a student's learning curve and understanding by **74%**. Add notes, observations, and critiques and watch them soar!

- Live interaction and communication
- Live or post recording video embedded notes
- Ideal in simulation and role-play environments
- Easy collaboration between individuals and/or groups located in various locations

HOW

Web Based Server

- HIPPA Compliant
- You OWN your content
- Use your Network Server or our Cloud Solution
- Unlimited Users, User profiles, file sharing
- Profiles may contain: videos, documents, spread sheets, PDF's & photo images
- Content is available for viewing and sharing within 60 seconds of reaching the server
- NO VIDEO BUFFERING!

Data Distribution

- Easily define content distribution to:
 - One or multiple individuals
 - Groups of students by section/course, department, and/or location
 - Professors, Students, Deans, Staff, Administrators, and/or Clinicians
