

interact™
solution

K-12 EDUCATION

the solution for evolving education

interact Solution™ is a cohesive turn-key online video solution that is supportive of today's blended learning methods and teaching techniques, collaborative observations and evaluations, and providing an integrative safety and security surveillance system.

interact achieves this through real-time video monitoring or recorded video, audio, and alert configurations while supporting embedded annotations directly into the video that may be shared through the secure Web Portal.

-  Flipping the Classroom
-  Safety & Security Control
-  Video Observation & Evaluation

SAFE & SECURE SCHOOLS

Keeping schools, students, and teachers safe is a priority in today's educational environments. While many schools are in the process of, or have already, initiated security procedures and policies, we take it a step further with our **interactWEAR™** Control Button!

SAFETY
FIRST!

This new technology, a wireless button transmitter, is a wearable device that can trigger an automated action and/or initiate a sequence of actions to be performed by simply depressing the unit's control button for a defined and distinct period of time.

Using the button a teacher may: initiate a camera to begin recording observable behaviors that are occurring, notify administrators that an event is taking place in which they need immediate assistance at their location, or if there is a severe threat and 911 authorities need notified.

The possibilities are limitless and we are happy to customize this solution to meet your needs.

WHAT

A single solution that integrates: classroom safety, blended learning utilizing video, and in recording observable behaviors for evaluation and reflection.

- **interactWEAR™** control button for school safety and security alert initiatives via email, on-screen messages, and visual emergency alarms
- Video record actions and observable behaviors that may be later evaluated and easily share with teachers, students, administrators, superintendents, and/or parents/guardians
- Easy to use secure web-based video technology for Flipping the Classroom for blended learning
- **DualSYNC™** to view two camera angles simultaneously live and/or pre-recorded with synced annotates within the video

WHERE

Anywhere you are connected to your network or where there is internet connectivity.

- On-site (classrooms, observation labs, science and research, viewing room, campus offices)
- Off-site (access for field studies via our mobile app at remote locations)
- Accessible from multiple locations and by multiple individuals simultaneously
- Accessible using PC, laptop, tablet or smartphone (mobile app for Apple & Android)
- Record video using network or wireless camera, webcam, flip cam, tablet or smartphone
- Self-authoring video for quick self-reflection and advancement

GENERAL

- Unlimited User IDs and profiles
- Password and Login secure, accessible 24/7
- Secure private sharing and definable access restrictions
- Activity Tracker that captures IP address, Login ID, task activity, and viewing timeframes
- Customizable with your School/District logo, mascot, and/or color preferences

WHY

Adopting video technology in education accelerates a student's learning curve and understanding by **74%**. Add notes, observations, and critiques and watch them soar!

- Student safety and security in the school
- Live interaction and communication
- Live or post recorded video embedded notes
- Ideal in simulation and role-play environments
- Easy collaboration between individuals and/or groups located in various locations

HOW

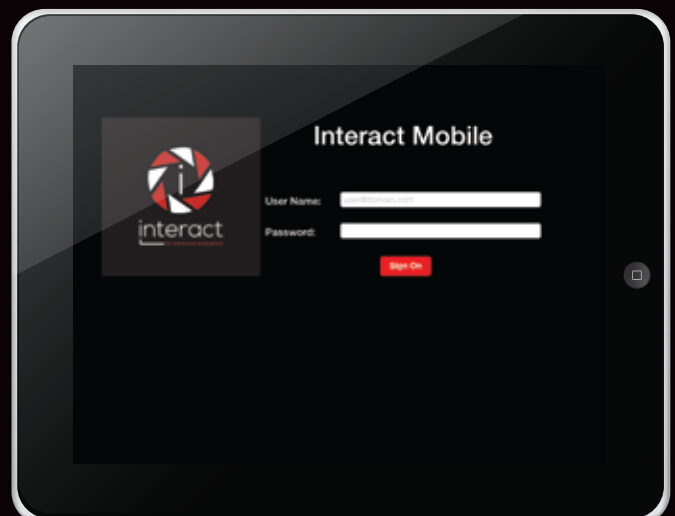

Web Based Server

- Use your Network Server or our Cloud Solution, either way you OWN your content
- Unlimited Users, User profiles, file sharing
- Profiles may contain: videos, documents, spread sheets, PDFs, & photo images
- Content is available for viewing and sharing within 60 seconds of reaching the server
- NO VIDEO BUFFERING!
- Meets HIPPA Compliance Standards

Web Portal Data Distribution

Hierarchy structure allows easy and secure content distribution to those within or out of the network to:

- One or multiple individuals
- Groups of students by class, course, subject, team, department, and/or location
- Principals, Administrators, Superintendents, Teachers, and/or Guardians and Authorities
