

interact™
solution

SALES LAB

the solution for innovative learning

Interact is a turn-key video learning development solution, document sharing tool and data distribution tracking center geared towards enhancing training programs. Through innovative teaching techniques and video collaborations, simulations and role play, Interact is the gateway to quickly improving student's valuable skills, development and tracking improvement and compliance. Interact also fosters efficient and unique methods of creating specialized or personal sales experiences that may be shared with outside companies, sponsors and clients.

Live Interaction & Video Recording

Student & Professor Collaboration

Increase Student Job Placement

Secure Proprietary Content & Dissemination

“

Today's student needs to be taught differently. Traditional methods such as lecturing and exams does not provide for a great learning experience for the tech savvy generation. Interact enables students to develop their skills through active, self assessment. Interact is completely hands on. There are a lot of moving parts in implementing any type of technology endeavor. The interact employees are true professionals and delivered on a great technology product that has enabled Elon to create an engaging learning experience.

”

—Michael Rodriguez, Ph.D., Elon University

WHAT

Adopting intuitive technology accelerates learning proficiencies with real-time or recorded video interaction between professors, students and clinicians.

- Gateway to observing and enhancing program offerings and capabilities through virtual video observation and simulation environments
- Fosters joint collaboration, observations, critique, and feedback evaluations embedded directly into the video by multiple individuals
- Self-authoring video (practice) for quick self-reflection that promotes technique advancement
- Two-way communications between classrooms and observation room with microphone and mini-earbud

WHERE

Anywhere, Worldwide!

- On-site (in the classroom, observation room, office, study room, lab, anywhere on campus)
- Off-site (at home, in the field, coffee shop, library, extension campus, office, airport, etc.)
- Accessibility from multiple locations and by multiple individuals simultaneously
- Access via PC, laptop, tablet or smartphone (web app and mobile for Apple© & Android©)
- Login via mobile app through your network, via Wi-Fi, or by using your devices data service

WHY

Reach your audience quicker through live video interface or pre-recorded content sharing.

- Distance & virtual learning
- Collaboration with others
- Mentoring & coaching tool
- Customized course/product training
- New Technique Introduction Videos
- Students may share their videos with prospective employers
- Create Program promotional videos to further reach prospective students

HOW

- Live two-way streaming
- DualSYNC™ side-by-side live viewing and/or recording from multiple camera angles with synced annotations
- Recordings viewable and sharable within 60 seconds of reaching our Server
- NO VIDEO BUFFERING

GENERAL

- Activity tracker captures Login ID, content viewed, shared, and task movements
- Secure and private sharing and definable access restriction
- Password and Login security 24/7
- Time-sliced video annotates for quick reference
- Mobile app captures not only keyboard typing but also on-screen drawn and written notes
- Customizable with your logos, color preferences and overall branding

Web Based Server

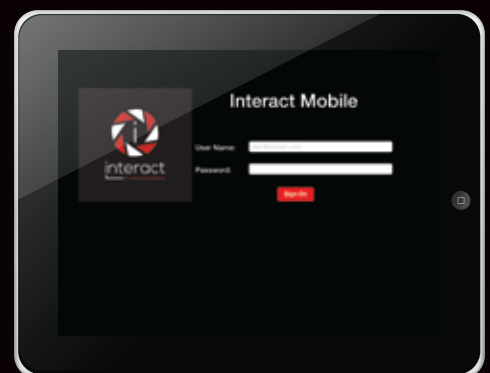

- HIPPA Compliant for Proprietary Information
- You OWN the content
- Use your Network Server or our Cloud Solution
- Unlimited Users, User profiles, file sharing
- Profiles may contain: video, photo images, documents & spreadsheets
- Integrates with other applications to easily import and manage students in a classroom format
- Built-in FTP utility to quickly upload mass collections of content

Data Distribution

Easily disseminate content to

- One or multiple individuals (students, professors, clinicians, administration, etc.)
- Groups by course, section, department, title, instructor or classification
