

According to an Exhaustive Study by the NIH
Video Review of Simulation Training is a Superior
Approach for Medical Student Learning

As a military medical instructor your mission is to prepare the next generation of military Physicians and Nurses for a lifetime of service.

Simplicity That Works

Interact Solution is a audio-video simulation management system designed for medical instructors to record, organize and grade student simulations. Delivering timely evidence-based feedback, Interact Solution is an ideal complement to your existing curriculum.

ABOUT US

Interact Solution was developed by listening to simulation experts like you. Our directive was to create an evidence based video simulation management system that is easy to use, by instructors and students, regardless of technical savvy. In addition, they wanted a mobile application that could be used away from the simulation room, allowing them to extend their training into the field.

Based on a decade of client feedback, our solution is designed to work, within any simulation environment, spanning the entire Health Sciences spectrum.

Today, prestigious organizations, all over the country, rely on our technology to strengthen knowledge retention across a wide spectrum of simulation environments.

ABOUT OUR TECHNOLOGY

It's Simplicity That Works!

Interact Solution is an audio-video simulation management system designed to record, organize and annotate student simulations. Instructors can create student rubrics, bookmark and annotate simulation videos and deliver immediate feedback for formative development.

Noteworthy Features

Video Distribution

Easily store and distribute content by individuals, groups, departments, sections, classifications, organizations and/or locations.

Enterprise-Level Security

2048 bit encryption with SSL Certificates and each individual has a unique profile.

Multi-angle video capture

Capture wide, medium and close-ups at once with the most flexible camera support in the industry. Web, IP, and SDI cameras are all supported.

Single Sign On

Integrates with LDAP and Active Directory for Single Sign On and easy import of student account information.

Government Compliance

HIPPA and FERPA Compliance

Live Streaming

Live streaming via my web browser for real-time coaching and debriefing.

Video Compression

60% compression means that all recordings are accessible in less than 60 seconds regardless of size!

OSCE Management

Automate OSCE scheduling, enrollment and notifications.

Automation

Assemble user portfolios automatically while tracking performance and progress. The comprehensive record of all center activities for each user is filterable and searchable.

Why Limit Your Training to a Fixed Location?

Our Mobile Application empowers instructors and students to train in the field and complements formal annotations with freestyle onscreen notes.

Benefits of working with us

- Interoperability allows us to work with all major manikin companies
- We are highly Accessible and we listen to your needs
- Simplicity that works in most simulation environments

The United States military conducts medical simulation training at locations all around the world - all of which have highly diverse capabilities and requirements.

Whether it is in a simulation room at a military hospital, during combat training in the desert, or on the deck of an aircraft carrier, our technology is designed to complement medical simulation training so that the world's finest physicians, nurses, medics, corpsmen, and technicians are ready to deliver the right kind of care when it's most critical.
